

Table of Contents

1. Introduction

- 1.1 Introduction and Overview
- 1.2 Background to African Debt and Macro Policy Debates
 - 1.2.1 Background to African Debt
 - 1.2.2 Africa's Economic Crisis – What caused it?
- 1.3 The Historical Origin of Africa's Economic Linkage with the North
 - 1.3.1 Pre-colonial Trade in Africa
 - 1.3.2 The Formation of a Commodity Exporting and External Finance Constrained Economy
 - 1.3.3 The Three Macro-Regions of Colonial Africa: The Amin-Nzula Category
- 1.4 Some Notes on Methodology
- 1.5 Organization of the Book

2. Trade, Finance and Development in A Global Context

- 2.1 Introduction
- 2.2 Finance Theories, North-South Modeling and the African Context
 - 2.2.1 Foreign Direct Investment
 - 2.2.2 Theories of Bank Lending and Optimal Borrowing
 - 2.2.3 Models of Sovereign Lending and The Institutional Response
 - 2.2.4 Official Capital Flows
 - 2.2.4.1 Economic and Geo-Political Factors
 - 2.2.4.2 Aid as a Public Good
 - 2.2.4.3 Empirical Studies
 - 2.2.5 Conclusion
- 2.3 International Trade Theories and Their Relevance in Modeling Africa
 - 2.3.1 A Brief Overview of Trade Theories and their Implications for Africa
 - 2.3.2 Non-Orthodox Models and Trade in Primary Commodities
 - 2.3.2.1 Unequal Exchange
 - 2.3.2.2 The Structuralist School and The Prebisch-Singer Hypothesis
 - 2.3.2.3 The Prebisch-Singer Hypothesis and Empirical Evidence
 - 2.3.3 Quantitative Models of Trade in Primary Commodities
 - 2.3.3.1 Structure of Theoretical Primary Commodity Models
 - 2.3.3.2 A Brief Overview of Recent Commodity Models of 'the South'
 - 2.3.4 Conclusion

3. The Macroeconomics of Africa: Import Compression and External Finance

- 3.1 Introduction
- 3.2 A Cursory Look at Some Macro Models of Africa
- 3.3 Some Basic Issues in African Macroeconomics
 - 3.3.1 Import Compression
 - 3.3.2 Macroeconomic Effects of External Finance
 - 3.3.3 The Accounting Framework
 - 3.3.3.1 An overview
 - 3.3.3.2 The Accounting Framework
- 3.4 Conclusion

4. Determinants of African Foreign Exchange Supply

- 4.1 Introduction
- 4.2 Determinants of Financial Flows to Africa: Preliminary Econometric Results
 - 4.2.1 Determinants of Allocation of FDI to Africa
 - 4.2.2 Determinants of Allocation of Official Capital Flows to Africa

- 4.3 Determinants of African Export Supply
 - 4.3.1 Introduction
 - 4.3.2 The Literature
 - 4.3.2.1 The Link between Supply Theories and estimation Technique: The Relevance of ECM
 - 4.3.2.2 The Theoretical Model of this Study
 - 4.3.2.3 The Theoretical Export Supply Function and the Data
 - 4.3.3 The Data
 - 4.3.4 Estimation
 - 4.3.4.1 Estimation Approach
 - 4.3.4.2 Results
 - 4.3.5 Summing Up
 - 4.4 African Exports in a Global Context
 - 4.4.1 Introduction
 - 4.4.2 The Global Commodity Model
 - 4.4.3 Estimation of the Model
 - 4.4.3a Time Series Properties
 - 4.4.3b The Econometric Model and Estimation Results
 - 4.4.4 Locating African Commodity Trade in the Global Market
 - 4.5 Conclusion
- 5. External Finance and The African Economy: A Macro Approach**
- 5.1 Introduction
 - 5.2 The Fiscal Response to External Finance
 - 5.2.1 Introduction
 - 5.2.2 The Model
 - 5.2.3 Estimation Results
 - 5.2.4 Summing Up
 - 5.3 Aid and the 'Dutch Disease' in Africa
 - 5.3.1 Aid and the 'Dutch Disease'- an overview
 - 5.3.2 Aid, The 'Dutch Disease' and the African Context
 - 5.3.3 Estimation Results
 - 5.3.3.1 Empirical Approach
 - 5.3.3.2 The Data
 - 5.3.3.3 Estimation Results
 - 5.3.4 Summing Up
 - 5.4 Private Investment and Import Compression: Econometric Results
 - 5.5 Conclusion
- 6. Modeling Africa within a Global Economic Framework**
- 6.1 Introduction
 - 6.2 Basic Theoretical Models
 - 6.2.1 The Mundell-Fleming Model
 - 6.2.2 The Theoretical Basis of Recent North-South Models
 - 6.2.2.1 The General Framework
 - 6.2.2.2 The Solow-Lewis Model
 - 6.2.2.3 The Kalecki-Lewis Model
 - 6.2.2.4 The Neo-Marxian North and a Lewis South Model
 - 6.2.2.5 Some Points About Capital Flows
 - 6.3 Standard North-South Linkages
 - 6.3.1 Financial Linkages
 - 6.3.2 Trade Linkages
 - 6.4 Summing Up
 - 6.5 Africa within a North-South Framework: A Neostructuralist Global Econometric Model [AFRIMOD]

- 6.5.1 The North
 - 6.5.1.1 The Major Macro Aggregates Sub-Bloc
 - 6.5.1.2 The Official Capital Flows Sub-Bloc
 - 6.5.1.3 The Foreign Direct Investment Sub-Bloc
 - 6.5.1.4 The Commodity Sub-Bloc
- 6.5.2 The South: Africa
 - 6.5.2.1 The Major Macro Aggregates Sub-Bloc
 - 6.5.2.2 The Fiscal Response Sub-Bloc
 - 6.5.2.3 The Commodity Export Supply Sub-Bloc
 - 6.5.2.4 The 'Dutch Disease' Sub-Bloc
- 6.5.3 Major Oil Exporting Countries (OPEC)
- 6.5.4 International Banking
- 6.5.5 Identities Used
- 6.5.6 Some Partial Equilibrium Based Analytical Solutions
- 6.5.7 Parameters of the Model
 - 6.5.7.1 Parameters Derived and Used From Previous Studies
 - 6.5.7.2 Estimated Parameters of The Model

7 The Effect on Africa of External Shocks Generated in Developed Countries

- 7.1 Introduction
- 7.2 World Accounting Matrices (WAM) as Database for AFRIMOD
- 7.3 Model Solution Algorithm and Stability Conditions
- 7.4 Analysis of External Shocks and Policy simulations using AFRIMOD
 - 7.4.1 An increase in the level of aid to the South
 - 7.4.2 Debt Cancellation to Africa
 - 7.4.3 An Increase in Public Investment
 - 7.4.4 An Increase in the World Interest Rate
 - 7.4.5 An Increase in Oil Price
 - 7.4.6 An increase in Supply of Commodity Export by Other South
- 7.5 Conclusion

8 Concluding remarks

Appendix 4.1- Econometric Approach Followed

Appendix 4.2- Stationarity Condition of the Expected Profit Indicator

Appendix 4.3- Results Using First Difference Values in the Global Commodity Model

Appendix 5.1- The Structure of Heller's Model

Appendix 5.2- Estimation Using Other Approaches

Appendix 6.1-OLS Estimation Results
